

PROPOSED G1 UPPER-CHEST MID-360 INSTALLATION

torso_link coordinates · optical origin (0.125, 0, 0.248) m · inverted · yaw 0° · 35.5° down

Mount at the height of the two upper-chest anchors, centered on the sagittal plane, and extend slightly ahead of the torso shell.

Trusted deployment data: 23,075 samples / 16 active episodes / 102.5 s · coverage at this origin: 98.7% ball center, 97.4% full 20 cm ball · practical pitch tolerance: 33°-37° down

Blue-gray outline: exact torso_link STL projection. Cyan housing: 65 × 65 × 60 mm schematic envelope; verify the official CAD origin and fastener interface before fabrication.
